

CASE STUDY

Defeated Model State Legislation Potentially Damaging to Client

Challenge:

Defeating proposed model legislation damaging to association client's industry from a national legislative policy group.

Stateside Solution:

Stateside Associates directed an effort to defeat model legislation:

- We represented the client through testimony before the committee considering the model legislation.
- We identified potential allies and explained the risks of the proposed legislation to their interests.
- We researched and provided evidence to key committee members about the consequences of the model.
- We coordinated communication between key committee members and other policy groups who had previously defeated a similar policy.

Results:

The sponsor withdrew the legislation from consideration after finding insufficient support in the committee for further consideration.
