

CASE STUDY

Led State Regulation and Licensing Initiative for Health Care Client

Challenge:

More favorable treatment of a client's health-related profession in state regulation.

Stateside Solution:

- We produced a report detailing the current licensing and education accreditation standards for the client in all 50 states.
- We identified key state licensing opportunities for client comment and participation.
- We led recruitment efforts for vacancies on a local professional board.
- We drafted client comments and amendments for rulemakings and legislation.
- We obtained regulatory agency support for amendments to legislation that created a new professional license.
- We represented the client on an initial rulemaking advisory committee for a new state license. We also secured the appointment for the client.

Results:

Our efforts resulted in increased visibility of client licensing issues on professional board agendas, which led to favorable rule amendments.
