### **NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS (NAIC)**

Stateside Contact: Robert Holden at [rah@stateside.com](mailto:rah@stateside.com)

NAIC's Statutory Accounting Principles (E) Working Group adopted three interpretations related to COVID-19. These allow insurance reporting entities to respond to policyholder needs for premium payment delays and address mortgage loan modification or forbearance requests, while mitigating insurance reporting entity concerns on the impact to statutory financial statements.

The interpretations provide additional time for insurance reporting entities to collect premium receivables before reporting the receivable as non-admitted in the statutory financial statements.

In addition, the interpretations provide allowances to insurance reporting entities in classifying a mortgage loan or bank loan, which was modified in response to COVID-19, as a troubled debt restructuring. Finally, the provisions allow deferred insurance reporting entity impairment assessments for bank loans, mortgage loans and investments, which predominantly hold mortgage loans due to forbearance or modifications, in response to COVID-19.
