

STATE COVID-19 VACCINE REPORT

Twenty-one states, DC, and Puerto Rico have given at least one dose of the vaccine to 70% of adults: California, Colorado, Connecticut, Delaware, Florida, Hawaii, Illinois, Maine, Maryland, Massachusetts, Minnesota, New Hampshire, New Jersey, New Mexico, New York, Oregon, Pennsylvania, Rhode Island, Vermont, Virginia, and Washington.

The U.S. Food and Drug Administration has updated its emergency-use authorization for both the Pfizer and Moderna COVID-19 vaccines to include a third booster dose for individuals with compromised immune systems. This update applies to individuals who are recipients of solid organ transplants, and to people with other conditions that “are considered to have an equivalent level of immunocompromise,” the agency said. Eight states, many of which have lagged the national average for vaccinations, have COVID-19 patients that account for at least 15% of their overall hospitalizations: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Nevada, and Texas, according to the US Department of Health and Human Services.

PERCENTAGE OF INDIVIDUALS PARTIALLY VACCINATED VS FULLY VACCINATED BY AGE GROUP

This graphic represents the percentage of people each age group that have received one dose of the vaccine versus the percentage of individuals in each age group that are fully vaccinated. Individuals under 12 have not yet been approved to receive the vaccine.

- Percentage of Individuals with One Dose
- Percentage of Individuals Fully Vaccinated

PERCENTAGE OF POPULATION COVERED

TOTAL U.S. DOSES ADMINISTERED: 353,859,894

167 million people have completed a vaccination regimen. If the U.S. continues to administer an average of 681,816 doses per day, then it will take 6 months to cover 75% of the population.

TOP 5 STATES OF PERCENTAGE OF POPULATION COVERED: Vermont (71.8%), Massachusetts (69.4%), Connecticut (68.1%), District of Columbia (67.4%), and Maine (67.0%)

BOTTOM 5 STATES OF PERCENTAGE OF POPULATION COVERED: Mississippi (39.2%), Alabama (39.5%), Idaho (40.7%), Wyoming (41.1%), and Louisiana (42.7%)

PERCENTAGE OF SUPPLY USED

TOTAL PERCENT OF U.S. SUPPLY USED: 86.2%

TOP 5 STATES OF PERCENTAGE OF SUPPLY USED: New Mexico (101.1%), Wisconsin (95.4%), Connecticut (92.4%), Washington (92.3%), and Massachusetts (91.1%)

BOTTOM 5 STATES OF PERCENTAGE OF SUPPLY USED: Alabama (69.9%), West Virginia (74.9%), Mississippi (75.3%), Georgia (76.5%), and Idaho (78.4%)
