

Stateside Associates – Leadership Connect Partnership

Announcement

To support the growth of our Monitoring Service offerings and keep stride with the ever-changing content, policy and technology needs of today's government relations professionals, **Stateside Associates is excited to announce that we are partnering with Leadership Connect** to develop a more robust, user-friendly technology platform.

Our clients increasingly express the need for relationship management tools and access to state and local government contacts. This is why we have turned to Leadership Connect to help us better deliver our Legislative, Regulatory and Local Monitoring offerings in 2026.

Leadership Connect is among the nation's premier public sector software companies with real expertise in big data, machine learning, stakeholder mapping and an established monitoring platform – they have truly reimaged the analog workflows of the public sector for the digital age.

With our new partnership, we will be delivering the same functionality you're familiar with in StateLink on a stable monitoring platform ensuring a reliable user experience. Alerts, notices and state activities will be delivered to you faster and you will continue to have easy access to our professional staff.

Our monitoring services will remain people-centric and be powered by stronger technology to provide more accurate results, faster and with greater efficiency.

We know that you value our unique approach to legislative, regulatory and local monitoring and this partnership will make our services even better for you. We will be contacting you soon to provide more information and are available if you have any questions.
